Project Development Phase
Performance Test

Date	2 MARCH 2026
Team ID	Adarsh Singh Aditi Parashar Aditya
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Housing dataset containing attributes like Sale Price, Location, Bedrooms, Bathrooms, Area (sq ft), Year Built, Property Type was successfully imported and rendered in Tableau. The dataset consists of multiple records representing housing sales across different locations.
2	Data Preprocessing	Data cleaning was performed before visualization. Missing values were handled, duplicate records removed, and numeric fields such as Sale Price and Area were formatted correctly. Data types were assigned properly (dimension and measure).
3	Utilization of Filters	Interactive filters were applied such as Location filter, Price Range filter, Number of Bedrooms filter, and Property Type filter to allow users to dynamically explore housing trends.
4	Calculation Fields Used	Age Since Last Renovation Calculated fields created using renovation status. These calculations help in analyzing pricing patterns and market trends.
5	Dashboard Design	No of Visualizations / Graphs – 6. Dashboard includes Bar Chart (Price by Location), Line Chart (Price Trend Over Years), Pie Chart (Property Type Distribution), Heat Map (Price Density by Area), Scatter Plot (Area vs Price), and Map Visualization (Geographic Distribution of Houses).
6	Story Design	No of Visualizations / Graphs – 5. Story points explain the housing market trends, price comparison across locations, influence of property features, yearly price trends, and insights for buyers and investors.
